

# Gas Water Trap with Compensating Connector J-02P0.1G075/J-02P0.1G075

## I. Technical characteristics:

- Special process glass cover is adopted, which is easy to replace and filter
- The filter core is visible and easy to change and clean
- Base material: PTFE/PP material optional

It can integrate the humidity alarm function, and effectively protect the analyzer

## II. Technical parameter

- Sampling interface: PTFE G1/4-6mm
- Operating pressure: 5bar.abs
- Maximum capacity: 70cm<sup>3</sup>
- Filter material: glass fiber, silicon carbide(optional)
- Seal type: O type ring
- Bracket material: aluminum alloy
- Installation: wall mounted
- Filtration accuracy: 0.1-2um (optional)
- Alarm output: DC24V voltage output, It can be equipped with humidity sensor or connecting with peristaltic pump
